Professional Summary

Data Science enthusiast with hands-on experience in Power BI dashboards, Python-based analysis, and RAG-based AI applications. Skilled in data visualization, machine learning, and problem-solving, with a strong academic background. Seeking an entry-level role to apply data-driven insights in real-world business problems. .

Experience

iBase Electrosoft LLP Sep 29 – Oct 4, 2025
Python Trainee (Short-Term Internship) *Pune, India*
- Completed hands-on training in Python fundamentals and problem-solving.
- Developed mini-programs applying core programming concepts.

Education

North Maharashtra University Expected May 2027
MCA in Data Science (Curruntly pursuing) *Maharashtra, India*

North Maharashtra University June 2022 – June 2025
BS in Computer Science (CGPA: 8.51/10) *Maharashtra, India*

Projects

Asklytix – Data Analyst AI Web Application | FastAPI , React , LLaMA LLM
- Built an end-to-end AI-driven data analysis platform enabling users to extract insights via natural language queries.
- Integrated **Groq LLaMA LLM** for automated Python code generation and execution for dynamic data processing.
- Performed **data cleaning, analysis, and visualization** using Pandas and Plotly.
- Developed secure **Sandbox Execution** environment for safe runtime code execution.
- Built scalable backend APIs using FastAPI and interactive frontend using React.

Documind – RAG (Retrieval-Augmented Generation) based Web Applicaion | FastAPI , React
- Developed a web app to interact with PDF's using natural language queries.
- Inplemented **RAG** with **FAISS** for semantic search and **Ollama LLM** for response generation.
- Built backend API's with **FastAPI** and responsive UI using **React**.

Amazon Prime Video Dashboard (Power BI) | *Power BI, Excel*
- Developed an interactive Power BI dashboard analyzing 9,600 titles to identify trends in genres, ratings, and content distribution.
- Used **data modeling and visualizations** to uncover **platform growth patterns** and support **data-driven insights**.

Shipment Analysis Dashboard (Power BI) | *PowerBI, Excel*
- Built a Power BI dashboard analyzing **2M shipment records** across countries to track delivery performance and regional demand.
- Identified top-performing salespersons and **key logistics trends** using KPI metrics interactive filters.

Technical Skills

Concepts: EDA, Statistical Analysis, Data Wrangling, Data Cleaning, Data Modeling, Data Visualization, AI, Machine Learining, Data Structures and Algorithms, Object Oriented Programming, Prompt Engineering.
Languages: SQL, Python, C++, Java.
Analytics & Tools: Power BI, Excel, Jupyter Notebook, Google Colab, MySQL, MS SQL Server, PGAdmin
Certifications: Python for Data Science (Infosys Springboard), SQL (Analytics Vidhya), Statistics (Great Learning), Google Analytics, Python 3.4.3 Training (IIT Bombay).
